ACHILLÉE

PINOT BLANC

The Dietrich family has been farming grapes in Alsace since 1600. In 1999, Yves Dietrich converted the family holdings to organic and in 2003, to biodynamics. His sons, Pierre and Jean, took over in 2016. Achille means "yarrow" in French, which Steiner believed to be a carrier of spirit, bringing cosmic forces into the earth. The Dietrich family built the largest straw bale structure in Europe to date to house the winery.
